Kết Quả Xét Nghiệm Miễn Dịch Huỳnh Quang

Serial NO.: 2026021102
Pet name: Sushi
Owner name:

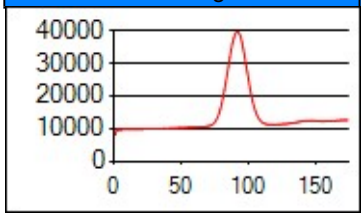
Sample No:
Barcode: 6544
Sample type: Faeces

Species: dog
Gender:
Age: 10 Y0 M

Test time: 02/11/2026 4:10:08 PM
End time: 02/11/2026 4:20:19 PM
Print time: 2026-02-11 15:21

Project	Name	Result	Reference	Unit	Low	Normal	High
CPV-Ag	CPV-Ag	18.93	0.00-60.00	ng/mL			

CPV-Ag



Result interpretation:

CPV-Ag:Normal.

Result:

CPV-Ag:0-60ng/mL normal; 60-300ng/mL Suspected canine parvovirus virus; ＞300ng/mL Contracted canine parvovirus virus;

Clinical significance:

CPV:CPV virus can attack intestinal epithelial cells and myocardial cells, mainly manifested as gastrointestinal diseases and myocarditis. Most young dogs are myocarditis, and canine parvovirus is homologous with cat parvovirus.

Diagnosis:

Note: The test result is only responsible for this specimen.
